

ICFG International Paper Prize

The International Cold Forging Group has established the ICFG International Paper Prize to honour young R&D workers of outstanding merit in the field. Candidates should be authors of original R&D, meeting the objectives of ICFG, i.e. to promulgate the economic advancement of cold forging by disseminating knowledge of relevant processes and sciences.

The International Paper Prize is granted on the following guidelines:

- The Prize is an open call for the Plenary Meeting participants, i.e., **not** only ICFG members are entitled to apply.
- The nomination must be made by an ICFG Full Member.
- Candidates should be no older than 35 at the end of the year in which they submit their application.
- Applicants for the Prize can be individual young researchers or small groups of researchers in the case, where it is difficult or impossible to attribute the contribution to one single person.
- The applicants should submit the following documents to register for the International Paper Prize:
 - Publication (according to the ICFG paper template);
 - CV;
 - Recommendation Letter;
- The prize will be given annually at the Annual ICFG Plenary Meeting in which the applicant must perform an oral presentation of his work.
- A monetary prize of € 1.000,00 will be granted to the winner.
- The Prize winner would be found through a procedure with evaluation by an international group of experts and final selection by the ICFG Advisory Board.

The Advisory Board holds full rights for setting up the detailed conditions and procedures for the call for nominations, evaluation by an international group of experts and final selection by the Advisory Board.
